

We don't recruit for a job, but for a career.

The second largest electricity producer and energy supplier on the Belgian energy market, EDF Luminus, is part of the EDF group. With an installed generation capacity of 2,137 MW, the company represents 14 % of national electricity generation. EDF Luminus is historically a green energy producer with gas-fired power plants, wind farms and hydraulic power stations on various sites in Wallonia and Flanders. EDF Luminus has also participations in nuclear plants.

Under the brand name Luminus, the company sells electricity and gas to 1,7 million residential and professional customers, bringing its commercial market share to 20%. EDF Luminus also operates on national and international energy markets, where the company buys and sells gas and electricity. The company has approximately 1,000 employees.
